## **ABSTRACT**

At the outset, A Sustainable Approach to E-Learning mentions that there would be nearly twice as many college students in the world by 2025 compared to the current 70 million. Starting off, A Sustainable Approach to E-learning mentions that there will be nearly twice as many college students in the world by 2025 compared to the current 70 million. It is the goal of this chapter to look at the role that an e-learning platform plays in the process of pedagogical growth. The purpose of this essay is to contribute to a deeper comprehension of how information systems shape the emergence of novel pedagogical viewpoints for various user groups. While the participants' ages did show statistically significant variations, their e-learning platform requirements and expectations were similar across age groups.

Keywords: Users, Complexity, Sustainable, Platform, E-learning.
